Chapter 26, Sheboygan Municipal Code, so as to require a license for installation and repair, etc. of low voltage installations in commercial buildings and providing a fee for certain inspections and re-inspections for such installations.

BACKGROUND / ANALYSIS:

Low voltage wiring installations is defined as wiring for uses that are typically 50 volts or less. Low voltage wiring could be used for doorbells, alarm system sensors, heating and cooling thermostats, data and voice wiring, etc. Low voltage wiring is covered by the National Electric Code (NEC) which the city adopts in Municipal Code. In the past, the City of Sheboygan did not inspect or require a permit for this type of wiring. Under these ordinance changes, the City Electrical Inspector would be inspecting low voltage wiring in commercial buildings only and would require the contractor to be licensed to complete the work as well as charge a fee of \$1.00 per drop to cover the inspection costs of the inspector.

STAFF COMMENTS:

The purpose of starting to inspect these wiring to make sure the low voltage wiring is properly installed by a licensed contractor and complying to the NEC and eliminating contractors that do not hold any electrical licenses or certifications from completing the work in a poor workmanship manner.

ACTION REQUESTED:

Motion to recommend to the Common Council to approve Gen. Ord. No. 39-19-20, an Ordinance amending various sections of Article III. Chapter 26, Sheboygan Municipal Code, so as to require a license for installation and repair, etc. of low voltage installations in commercial buildings and providing a fee for certain inspections and re-inspections for such installations.
