Memo

To: Public Works Committee

From: Joel Kolste – Street Superintendent

Date: 7-16-13

Re: 808 Wilson Ave.

Dear Committee Members,

The Department of Public Works received a complaint from Mr. Roger Scheuren back in February / March of 2013 regarding the flooding issues he was experiencing at the property he owns at 808 Wilson Ave. We investigated the complaint and found that his garage was full of water. His garage fronts a City owned alley located on the north side of Wilson Ave. approximately 200' west of S. 8th St. This alley is a gravel alley that has never been paved located in Lake View Park Block 21.

There are four residents that are serviced by this alley, some of which have concrete driveway approaches that abut the City Alley. Existing drainage is not adequate causing flooding of this alley and adjacent properties.

Pat Eirich with City Building Inspections had contacted me regarding the same property and indicated that through an investigation of a complaint; found that Mr. Scheuren's gravel parking lot for this property was in violation of an existing City Building Code. Pat is requiring Mr. Scheuren to pave his parking area. Mr. Scheuren indicated he wouldn't have a problem paving his parking area but is concerned that until the drainage issue is fixed, this would be money wasted as the pavement will prematurely fail due to the water issues.

This issue is being brought forward to the Committee as the current City policy is to not provide funding to repair and or pave/repave alley's within the City. Under normal circumstances, all cost and labor associated with this repair would be passed on to the adjoining property owners.

We have completed a cost estimate to fix the drainage issue and to pave the alley so as to address the needs of the residents affected by this issue. This estimate (attached) includes all materials to complete the work utilizing the City of Sheboygan's Department of Public Works crew.
